Spanish - Basic

My website

I'm a UX & UI Designer certified by Google, working as a Product Designer and Project Manager. I work across the entire product development process, from discovery, ideation, and research to the creation of wireframes, high-fidelity prototypes, and usability testing. I also work directly with clients and Product Owners (POs). My routine includes creating development plans, managing sprints, and conducting quality assurance testing.

Professional Experience

XippTech - June 2026- Present

Product Designer working directly with POs and clients to build and maintain various B2B software solutions in HR, employee benefits, and telemedicine, as well as applications for end users.

I work on products used by companies such as iFood, Outback, Unimed, Samsung, Santander, and others.

MeuRH360 - June 2023 - May 2026

Head UX and UI Designer. I work as a generalist, covering activities from discovery and ideation to research and the creation of wireframes, mockups, and high-fidelity prototypes. I also have direct interaction with clients and P.O.s

After I joined the company, the delivery rate increased by 52%, and customer satisfaction with the platform rose by 36%. I created new personalized workflows and implemented a whitelabel design that was essential for the company to secure a contract with its largest client (MetLife Inc).

Freelancer - May 2022 - July 2023

I work as a generalist freelancer, offering UX and UI design services for complete projects or specific stages as per client needs.

Botelho Personalizados - April 2017 - April 2020

Branding and lead designer for digital and physical products. Activities focused on creating customized products, visual identity, and logos.

Community development volunteer - December 2019

Volunteer in the construction team with IVHQ and Dream Livingstone Zambia, whose objective was the construction of a public school in Livingstone.
